Funhit®

Contains Kalaya Oil

Transdermal transporter

COMPOSITION:

Each 1 ml of Funhit contains:

Clotrimazole..... 10 mg

Neomycin sulfate..... 5 mg

Dexamethasone sodium phosphate...0,5 mg

Solves the root cause

Funhit acts against fungi and bacteria located on the surface of the skin and goes beyond the dermis reaching the root of the problem thanks to Kalaya Oil present in the formula.

Funhit is antipruritic, prevents itching and is hypoallergenic.

Funhit does not contain alcohol, it does not irritate or dry out the skin, lubricates thanks to Kalaya Oil.

Funhit exerts synergistic anti-inflammatory effect, thanks to the association of Dexametasone with Kalaya Oil.

Funhit It is easy to apply. The flowing jet dispensing valve prevents direct contact with the affected skin.

INDICATIONS: For the topical treatment of skin affections caused by fungi and/or gram positive and gram negative bacteria in dogs, cats, cattle and horses. Acts against:
